DETERMINATION OF NONSIGNIFICANCE (DNS)

DESCRIPTION OF PROPOSAL

The **City of Mukilteo** is proposing the Bike – Transit – Walk Plan (BTW Plan) to improve mobility options throughout the City by designating future project locations for pedestrian and bicycle infrastructure. This plan is a functional document as an extension of the Mukilteo Comprehensive Plan. The BTW Plan identifies a list of projects to improve connectivity between origins and destinations to provide a higher level of mobility and enhanced livability within Mukilteo. In order to identify these projects, a data inventory was conducted to identify existing facilities for pedestrian and bicycles, transit facilities, barriers, and safe routes to school. This inventory led to a data analysis to determine the existing gaps between places people want to go (destinations) and where people are (origins). This analysis included community outreach. These primary components led to the selected alternatives.
